Identification of the chromatograms with respect to the organic solvent each one corresponds to was incorrect in Fig. 1. The chromatograms were reorganized in order of concentration and identified correctly as follows.

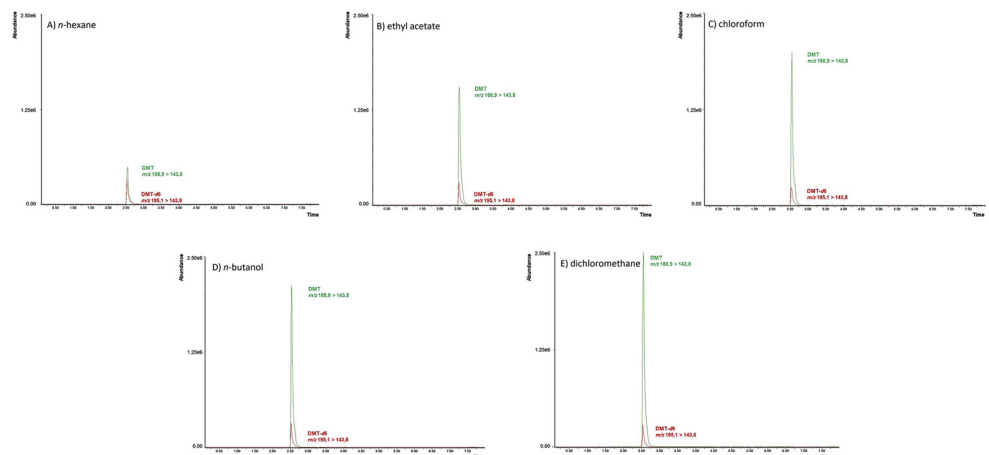

Fig. 1. Analysis spectra for each solvent utilized. Chromatograms obtained after serial dilution procedure and LC-MS/MS analysis of *M. hostilis* extracts performed with different organic solvents. DMT: dimethyltryptamine; DMTd6: deuterated dimethyltryptamine (internal standard)
