

Acta Oeconomica

Instructions for Authors

AIMS AND SCOPE

For more than 50 years, ACTA OECONOMICA has been the leading English-language scientific journal of economists working on Central and Eastern Europe. We publish papers on East European and Hungarian transition, theoretical and general issues of the transition process, economic policy, econometric methods and economic modelling. Space is also devoted to international economics, European integration, labour economics and welfare, industrial organisation, competition and regulation, finance and business economics. The journal has been operating fully in line with international academic standards, requiring original, unpublished research and double-blind peer reviews. ACTA OECONOMICA prefers articles based on quantitative analysis, but high-quality papers using verbal argumentation are also welcome. The language of the journal is English.

EDITORIAL BOARD INFORMATION

ACTA OECONOMICA was founded in 1966 by the Hungarian Academy of Sciences. Its publisher is Akadémiai Kiadó, Budapest, Hungary.

EDITORIAL BOARD

ACTA OECONOMICA is handled by an independent Editorial Board of autonomous scholars. Free from any external influence, they decide about the journal's policies in general, and – based on the outcome of a peer review – about the acceptance of papers in each concrete case. The names and affiliations of the Editorial Board members can be found on the [journal's web page](#).

REVIEW PROCESS

PREFERRED CONDITIONS OF MANUSCRIPTS

The ACTA OECONOMICA strives to publish high quality papers. To ensure this goal, we apply some basic principles when reviewing a manuscript. Not fulfilling these principles may lead to desk rejection of a submitted manuscript. All submissions are pre-screened by the editorial board and only those papers are submitted to the anonymous review procedure which fit the aims and scope of the journal.

REVIEW OF THE MANUSCRIPTS

The complete refereeing process for the journal is double-blind: the author(s) and the referees then cannot have any knowledge of each other at any time.

Each paper is refereed by (at least) two referees.

The assignment of three (two active and one on reserve) referees is made by the Editorial Board, avoiding any conflict of interest. To be able to do so, each member of the Board receives an anonymous, maximum one-page long abstract of the paper(s).

The decision after the first round of refereeing can be:

1. accept the paper without further corrections,
2. accept the paper with corrections and changes suggested by the referees and the editor(s),
3. request major changes and the paper is returned to the referees for a second round of refereeing,
4. the paper should be completely re-written along some well-specified guidelines and the journal would then accept a re-submission (the paper would be considered a new submission) and
5. outright rejection.

In order to increase the effectiveness of the review process, authors are kindly asked to respond to the comments and suggestions of the referees.

The Editorial Board based on the referee's report makes the final acceptance or rejection decision.

The Editor-in-Chief ensures the absolute confidentiality of the whole process.
