### REVIEW PROCESS

#### PREFERRED CONDITIONS OF MANUSCRIPTS

ACTA VETERINARIA HUNGARICA strives to publish high-quality papers. To ensure this goal, we apply some basic principles when reviewing a manuscript. Not fulfilling these principles may lead to desk rejection of a submitted manuscript.

#### REVIEW OF THE MANUSCRIPTS

Each paper will be read by at least two unbiased peer reviewers, chosen avoiding any conflict of interest. ACTA VETERINARIA HUNGARICA applies a single-blind review process, in which the reviewers' identities are hidden from the authors.

Authors are welcome to suggest reviewers when submitting their manuscripts. Suggested reviewers may not be in any way affiliated with the author or the work. Authors should provide any means of verifying the identity of the suggested reviewer, excluding e.g. a private email address. The editor may not use the author's suggestion, but it may facilitate the review process.

Manuscripts returned to the authors for revision should be resubmitted to the Editorial Office within two months of receipt, accompanied by the authors' detailed, item-by-item response to the reviewers' and editors' comments and suggestions.

Papers accepted for publication by the Editorial Board are subject to editorial revision.

Unpublished results are treated strictly confidentially.
