## Instructions for Authors

### REVIEW PROCESS

#### PREFERRED CONDITIONS OF MANUSCRIPTS

PHYSIOLOGY INTERNATIONAL strives to publish high quality papers. To ensure this goal, we apply some basic principles when reviewing a manuscript. Not fulfilling these principles may lead to desk rejection of a submitted manuscript. Papers are accepted on the basis of new significant contributions to insight of the field, and on the basis that the results have not been published, submitted or accepted for publication elsewhere.

#### REVIEW OF THE MANUSCRIPTS

Each paper will be read by at least two unbiased peer reviewers, chosen avoiding any conflict of interest. PHYSIOLOGY INTERNATIONAL applies a single-blind review process, in which the reviewers' identities are not revealed.

Authors are welcome to suggest or exclude reviewers when submitting their manuscripts. Suggested reviewers may not be in any way affiliated with the author or the work. Authors should provide any means of verifying the identity of the suggested reviewer, excluding e.g., a private email address. The editor may not use author's suggestion, but it may facilitate the review process. The usual duration of the review process is ca. 3-6 weeks. Unpublished results are treated strictly confidentially.

### COPYRIGHT AND LICENCE POLICY

#### OPEN ACCESS

Authors of PHYSIOLOGY INTERNATIONAL can optionally choose Open Access appearance. With this choice, readers can read, download, copy, distribute, print, search, or link to the full texts of articles, or use them for any other non-commercial lawful purpose. Such articles are distributed under Creative Commons Attribution-NonCommercial 4.0 International Licenses.

The Open Access Licence Agreement form can be downloaded from [here](#) (and a slightly modified variant [here](#); for those authors who are eligible for Open Access publication through the EISZ consortial agreement, see below).

Authors not opting for Open Access publication are expected to sign the **Copyright Transfer Form** available [here](#).

#### SELF-ARCHIVING

Authors are entitled to self-archive the postprint version of their manuscript. The postprint version is the author's manuscript or the galley proof or the author's manuscript along with the corrections made in the course of the peer review process. The authors' right to self-archive is irrespective of the format of the preprint (.doc, .txt, .pdf) version and self-archiving includes the free circulation of this file via email or publication of this preprint on any author's webpage or on the author's institutional repository with open or restricted access. When self-archiving a paper, the author should clearly declare that the archived file is not the final published version of the paper, he/she should quote the correct citation and enclose a link to the published paper ([http://dx.doi.org/\[DOI of the Article without brackets\]](http://dx.doi.org/[DOI of the Article without brackets])).

### AUTHOR CHARGES
