Figure S1. Molecular structures of the 8 BPU insecticides studied.
Figure S2. LC-MS/MS representative TIC-chromatogram of the 8 BPUs at 0.005 mg/kg in tomato and cucumber extracts.
**Figure S3.** Effect of formic acid addition to the mobile phase on the response of 8 BPU's.
**Figure S4.** Effect of vortex times on percent recovery of 8 BPUs insecticides at 0.01 mg/kg using the VA-LLE method (sample weight=10g, n=6, CH$_2$Cl$_2$ volume=2ml, without clean-up).
